Re: RM-11592

Dear Ms. Dortch:

On November 29, 2010, the undersigned met with John Giusti, Chief of Staff and Legal Advisor to Commissioner Copps. During the meeting we discussed the lack of interoperability in the 700 MHz spectrum. The undersigned reiterated several points made in previous filings in this proceeding regarding the urgent need for the FCC to resolve interoperability concerns in the 700 MHz bands.

The continued lack of interoperability across the 700 MHz bands is delaying the economic benefits that would accompany deployment of 4G technology from reaching substantial areas of the country. The lack of action on the issue of interoperability is keeping many carriers' capital sidelined – unable to create jobs or increase economic activity across their respective license areas.

Additionally, the lack of interoperability in the 700 MHz spectrum creates uncertainty regarding the utility of future paired-spectrum blocks, which could decrease revenues generated by future auctions.

Cellular South files this *ex parte* notification electronically with your office.

Sincerely,

/s/ Benjamin M. Moncrief
